FGM provides training and shows innovation in CIOSP

Once more, FGM Dental Products participates in the International Dental Congress of St. Paul into the dentists what’s most innovative products and scientific research.

In this 30th edition, which happens to 28 a 31 January 2012, no Expo Center Norte, the company has many new features and also scheduled a full grid of symposia and courses, and many activities for dental students and professionals who visit the company's stand, located between the streets 8.000 and 7.000, number 8080.

"As with all editions of CIOSP, prioritized by a participatory model with professionals. We share knowledge and experiences. This is one of our goals and, undoubtedly, our differential!”, Afirma White Mittelstadt, director of FGM Dental Products.
Considered one of the world’s most important events in the dental field and has attracted more than 80 thousand people in the last edition, the CIOSP 2012 will be a great opportunity for delegates to update themselves, exchange experiences and gain access to major innovations in scientific research, products and technology.

The event aims to provide outstanding opportunities for professional development, where dentists can adequately monitor the constant changes in the market and scientific advances.
